

Vegetables

Bean- 'Kentucky Wonder' Pole Bean

Description

Easy to harvest and very productive, this classic pole bean will happily climb toward the sky. Needs a trellis or other support. Pick the flattened, 7-9" pods early and often for best flavor and texture

Planting Instructions

- Full Sun
- Direct sow outdoors after frost: May- June
- Sow seeds 1" deep, at 4-8" spacing
- 55 days to maturity
