

Herbs

Cilantro, Slo-Bolt

Description

Easy to grow, cilantro is an essential ingredient in Mexican, Indian and Asian cuisines. Since cilantro will bolt to seed quickly in hot weather, plant every 2-3 weeks for a continuous supply of tender leaves. Pollinators love cilantro flowers, and the seeds are the spice coriander.

Planting Instructions

- Full sun
- Direct sow outdoors in April or August- Sept
- Sow seeds 1/2" deep at 3-6" spacing
- 45-65 days to maturity
