

Herbs

Scallion, Evergreen hardy

Description

Winter hardy perennial, easy to grow, versatile

Planting Instructions

- Sow seeds directly (outside) anytime 5/1-9/1
- ¼" deep, 1-2" apart in rows spaced 12-18" apart.
- Slow to germinate, especially in cooler temperatures.
- 65 days to maturity
- Plants will over-winter and will divide to grow in clusters when plants start growing again in Spring.
- Clumps can be divided in the second year or harvested.
- Be sure to keep patch well weeded, as scallions are not strong competitors.
